

Proceedings of the American Academy of Arts and Sciences Volume 19

By American Academy of Arts Sciences

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 176 pages. Dimensions: 9.7in. x 7.4in. x 0.4in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1884 Excerpt: . . . slit. Focused a Lyrae on the slit. There was blue h izz in the atmosphere. The flintier on the slit was moved be-tween the exposures of a Pcorpii and the Moon, but was not well adjusted, so the two spectra are superposed. Several of these photographs, as stated above, were taken to the Harvard College Observatory in the spring of 1883, when the measurements described below were made. This work may be divided into three parts: first, the determination of the relative positions of the lines in the various spectra in terms of any convenient unit of length; secondly, from the known spectra of the Moon and Jupiter, a determination of the relation of these measures to wave-lengths; thirdly, a reduction of the measures of the stellar spectra to wave-lengths, and a discussion of the results. The measures were made with the micrometer described in the...
