Reviews

An extremely wonderful pdf with perfect and lucid information. Better then never, though i am quite late in start reading this one. Once you begin to read the book, it is extremely difficult to leave it before concluding.

OSTEOLOGY OF THE GALLINAE During the past 20 years or more I have contributed a number of illustrated papers to the Osteology of various groups of gallinaceous birds, both existing and fossil. Some of these have been rather extensive, as those on the Tetraonidae of North America; on the turkeys; and on Gallus bankiva of India, and others, The more important of these will be cited or quoted from to a greater or less extent in the present treatise. So large is this group of birds, however, that it will not be practicable for me to deal with the osteology of all of its several families in this place, much as I should like to do so. To give some idea of our present knowledge of the number of species referred by some to this group I would say that in his Hand-List of Birds (1899) Dr R. Bowdler Sharpe considers them an order (II) of his scheme of classification, and designates it as the order Galliformes. This is primarily divided into three suborders, viz, the Megapodii (I), the Craces (II), and the Phasiani (III). The first of these is made to contain but the one family Megapodiidae, and to it are relegated seven genera of existing birds, the whole containing about 24 species, 17 of which are in the genus Megapodius. The Craces (suborder II) likewise contain but the one family Cracidae,...
