Rarebooksclub.com, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1890 edition. Excerpt: .and molten matter disarranges slightly gravitation, and causes those phenomena which we observe in the pendulum, that has created so much interest in its movements. There must also be some law that is acting on the magnetic pole, or variation of the compass; for we find it ever changing in one direction, viz., from east to west. The earliest records we have give the following results: We know that astronomy is one of the exact sciences, and we also know that astronomers have occasion at times to modify in some degree their calculations. And if the polar axis is changing, it might naturally be expected that such changes would be necessary. And what with improved instruments and greater knowledge in cosmography, in time greater results will be obtained, that will throw more light on this movement, particularly since science has arrived at its present...

Reviews

This publication is amazing. It is definitely basic but shocks in the fifty percent of your publication. You wont feel monotony at anytime of your own time (that's what catalogues are for concerning if you question me).

-- Prof. Kirk Cruickshank DDS

This kind of book is every little thing and taught me to looking ahead of time and a lot more. I am quite late in start reading this one, but better then never. I found out this book from my dad and i encouraged this pdf to find out.
